Excellent course, well organised and administered

## Content, scope, and structure of the course

### 1. The course was well organized.

Enter your rating for each numbered statement. Use the following scale to indicate to what extent you agree with the statement:

1 = Disagree entirely 2 = Disagree somewhat 3 = Neither agree nor disagree 4 = Agree somewhat 5 = Agree entirely

5

### 2. The organizers provided clear information about how the course would proceed.

Enter your rating for each numbered statement. Use the following scale to indicate to what extent you agree with the statement:

1 = Disagree entirely 2 = Disagree somewhat 3 = Neither agree nor disagree 4 = Agree somewhat 5 = Agree entirely

5

### 3. The online format worked well.

Enter your rating for each numbered statement. Use the following scale to indicate to what extent you agree with the statement:

1 = Disagree entirely 2 = Disagree somewhat 3 = Neither agree nor disagree 4 = Agree somewhat 5 = Agree entirely

5

### 4. If this course were given again, I would recommend this course to my students.

Enter your rating for each numbered statement. Use the following scale to indicate to what extent you agree with the statement:

1 = Disagree entirely 2 = Disagree somewhat 3 = Neither agree nor disagree 4 = Agree somewhat 5 = Agree entirely

5

## Closing questions

### 1. In your opinion, what are the course's strongest points?

The course has provided various alternative views to crucial issues of constructicon-building and addressed both practical and theoretical challenges of this field.

### 2. In what way can the course be improved?

In person instruction could be a bonus in the future. Introduction of the students to each other early in the course can be a way to improve the course.

Closing questions

1. In your opinion, what are the course’s strongest points?

The course brings together researchers from different countries and languages

2. In what way can the course be improved?

Maybe an event where the students present their project ideas and get feedback early in the course?

Closing questions

1. In your opinion, what are the course’s strongest points?

great variety, excellent introduction in constructicography; great way to get the research community together and to attract young scholars for the topics addressed

2. In what way can the course be improved?

the online format worked well, however, an on-site meeting in person would very much enrich the discussions and the scientific exchange both between the instructurs and between the instructors and the young scholars
